

Letter of thanks from Switzerland – AMO 2004

Hi Olav

My husband and I very much wish to thank you for the marvelous courses in Ilulissat. It was a real technical and also a physical challenge. Simply great!!!! I cannot express suitably how much all of us enjoyed our stay. We were deeply impressed by the high standard of orienteering we met. This will not mean that we expected bigger problems but each course was perfect in everything: no problems in organization, no problems in calculating the running times, no posts at a wrong place as it may happen. We really do acknowledge the big work you did.

When we came home we had the first pictures on the internet as well as the results (sometimes we wait for weeks for this!). But like this I could mail to all my friends your wonderful pictures and I am sure in the future you will have more Swiss participants (we - that´s for sure - will come back sooner or later).

Imagine everybody here in Switzerland thinks that it must have been very cold in Greenland and we could show them the sunny pictures with blue sky etc. During our absence it was raining here in Switzerland and it was real bad weather....

And further I have a specific "thank you". Fully unexpected I won a Tupilak on the Greenland Masterships. I like it very much and searched

on the internet for further information / details (which I found without any difficulties). Now it stands on my nighttable as remembrance. I am not so used in winning and therefore I am really happy to have won this Tupilak. Thanks again.

Thanks you and your colleagues once more for everything (also for the delicious dinner party and drum dancer, singers etc.)

With our best regards from Switzerland
Viktor and Heidi Näf
